FalcoTel-D Cycle Shelter

The cycle shelter FalcoTel-D is a double sided variant of the FalcoTel-E. With a distinct 'Y' shaped section, the FalcoTel-D has great symmetrical lines as well as complimenting the single sided cycle shelter of the range.

As an 'island' unit, the FalcoTel-D cycle shelter can be used as a stand alone unit or in rows to create a large storage compound.

The pitched roof section channels rainwater to the centre of the structure where it is collected in a gutter and discharged via a drain pipe to ground level.

As with the single sided cycle shelter, cladding is available for the end panels enabling designers to add playful variations to the scheme. The standard module is 4,000mm between the centres of the uprights and the canopy has a span of 3,700mm.
