## FalcoBreeze Cycle Shelter

### **A simply very good cycle shelter**

The FalcoBreeze cycle shelter is another new product from Falco offering a great alternative where floor space is at a premium. Increasingly on busy streets and walkways, signs, posts and street furniture are reducing the amount of available space for pedestrians to walk, so the FalcoBreeze creates a great cycle shelter space whilst occupying a minimum of floor space.

All steelwork of the cycle shelter is hot dip galvanised to BS EN ISO 1461 and polyester powdercoating is available as an additional option, in any of the 192 colours in the RAL register.  
The FalcoBreeze is a 2000, 3000 or 4000 mm long canopy with a 2000 mm curved sweep and provides a standard free head height of 2100 mm. However options are available for this highly modular design, for much greater spans up to 5000 mm.
