FalcoLite Double-Sided Cycle Shelter

Falco's collection of robust cycle shelter products boasts a combination of high quality material with a design-led composition, enabling a solid structure with no maintenance costs. The diversity of our cycle shelter range, enables a wide choice of specifications for Specifiers, Architects and Quantity Surveyors to match a cycle shelter to any required location.

FalcoLite Double Sided-Cycle Shelter

As noted for the single sided FalcoLite cycle shelter, the FalcoLite cycle shelter is available in three distinct variants; single sided, double sided and compound. The double-sided FalcoLite cycle shelter features facilities to accommodate twice as many bikes as the single sided cycle shelter without consuming double the space or that which two single sided cycle shelters would take. Equipped with integral gutters to prevent rain from falling down the cycle shelter entrance keeping all bicycles dry throughout the typical English weather!

The FalcoLite cycle shelters provide specifiers with a design perfectly capable of accommodating as many bikes as necessary to the specification required, from housing 8 cycles in a simple 1 bay unit to providing mass cycle parking facilities. A single unit can be easily extended using 'add-on' units to create a continuous line of covered shelters. By adding a bike rack, Sheffield stand or Toaster rack from Falco's cycle parking collection enables an attractive cycle shelter arrangement.

The FalcoLite cycle shelter range robust and hot dip galvanised to BS EN ISO 1461 and can be subsequently powder coated in a high finish in any of the 192 RAL colours.

For more information about the FalcoLite cycle shelter or our complete cycle shelter range, please contact one of our helpful sales team on (01538) 380080.
