FalcoLok-500 Cycle Store

The FalcoLok 500 is the biggest cycle shelter of the FalcoLok family. With a standard module size of 4,990 mm across the front and a depth of 3,980 mm the FalcoLok 500 cycle shelter is a very large equipment/cycle storage housed under a single roof span without internal supports.

As with all products in the range, the FalcoLok 500 cycle shelter can be extended both widthways and in depth, with the option to add doors on both the longer front or shorter side walls.

Installed by many local authorities as well as on private sites, the FalcoLok bicycle storage range is a unique solution offering great aesthetic qualities where a utilitarian store is required to not just house equipment but also look good and blend in with the overall design scheme.

All doors are supplied with a Europrofile cylinder lock for added security and can be arranged in either a single or double arrangement.
