Triangle Double-Sided Cycle Shelter

Again there is a double sided cycle shelter option making the Triangle a very versatile unit. Used as a standalone 'island' unit, the cycle shelter creates a great design statement with a the symmetry of the shelter arms creating a light and spacious feel. By utilising the pierced side panels, the design also provides a feeling of privacy when a demarcation of some description is required to highlight a specific use for the space.

By placing two units facing each other a covered walkway or compound can be created. Utilising the 2.25m span for each arm, a walkway 4m wide is possible – ideal for a public thoroughfare. Like all Falco shelters, the modular nature of the Triangle cycle shelter enables designers and specifiers to create a walkway system of any dimensions. Ideal for bus shelters, a public market, cycle parking or simple weather cover.
