Caleidogira

It is an unusual tool that takes advantage of the kaleidoscope effect. Everything around us is reflected on the reflecting panels inside the tube and multiplies in infinite copies. This gives rise to some spectacular effects particularly when sighted in a bright environment such as parks and gardens. Stainless steel structure with a Ø60 mm tube supporting element, Ø30 mm tube circular handle and Ø150 mm tube viewer element.

Design tobias.reposi, height 110 cm, diameter 90 cm.
