Wave after Wave

An intriguing pianola design which takes children into the world of sounds and waves. By turning the handle the glockenspiel-like wood laths move with a perfect wave. The motion also makes hammers move and produces sounds from the wood blocks. But if we let ourselves involve we will enter the interesting and complex world of waves, frequency and amplitude. The supporting structure is manufactured from Ø40mm stainless steel, and the wood sound blocks are manufactured from Iroko dim 40x40mm.
