

## Albatros Seat

The attractive Albatros range of seating is based on a laser cut side frame with a graceful theme resonant of a bird in flight. The products provide much choice with benches and seats with backrests in a variety of materials (stainless, wood, mesh and rod) with optional mounting arrangements.

### Albatros seat with concrete

The seat includes two round concrete bases and a steel reinforced 6mm thick frame. Length 1,815 mm. Overall dimensions: mm 2,350x710x760h. The seat and back are in steel rod grid Ø8 mm or alternatively hardwood or Pine rectangular seating boards with rounded edges measuring 1,800x55x35 mm. The seating boards are individually fixed to the frame. Available with hardwood boards, Pine, 8mm steel rods, or with attractive rounded horizontal tubing.

### Albatros seat with steel tubing

The seat includes two base plates for surface fix and a reinforced 6mm thick frame. Length 1,815 mm. Overall dimensions: mm 1,925x710x760h. Available with hardwood or Pine boards, 8mm steel rods, or with attractive rounded horizontal tubing. Photo 1 has seating and back boards in hardwood.

### Albatros wall seat

This is the wall mounted version of the Albatros seat range, with a beautiful adaptation without legs. Requires a sturdy wall to bolt to.

### Albatros stainless steel seat

An elegant seat leaning backwards. With stainless steel side supports (quality 316). Available with hardwood slats (photo 4) or tubes 60x30 mm. The side supports are laser cut and have oval base plates. Dimensions: 1815x760x710 mm.
